

A Quilter's Snowflake

A web extra from Quilter's Newsletter Magazine

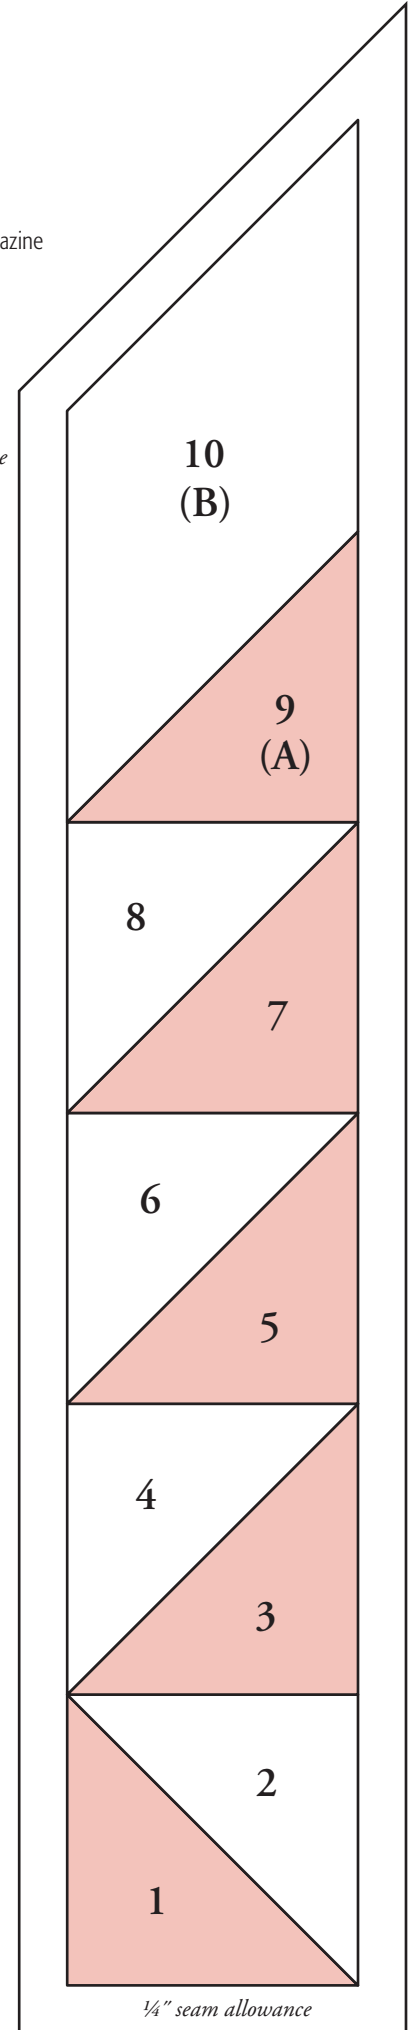

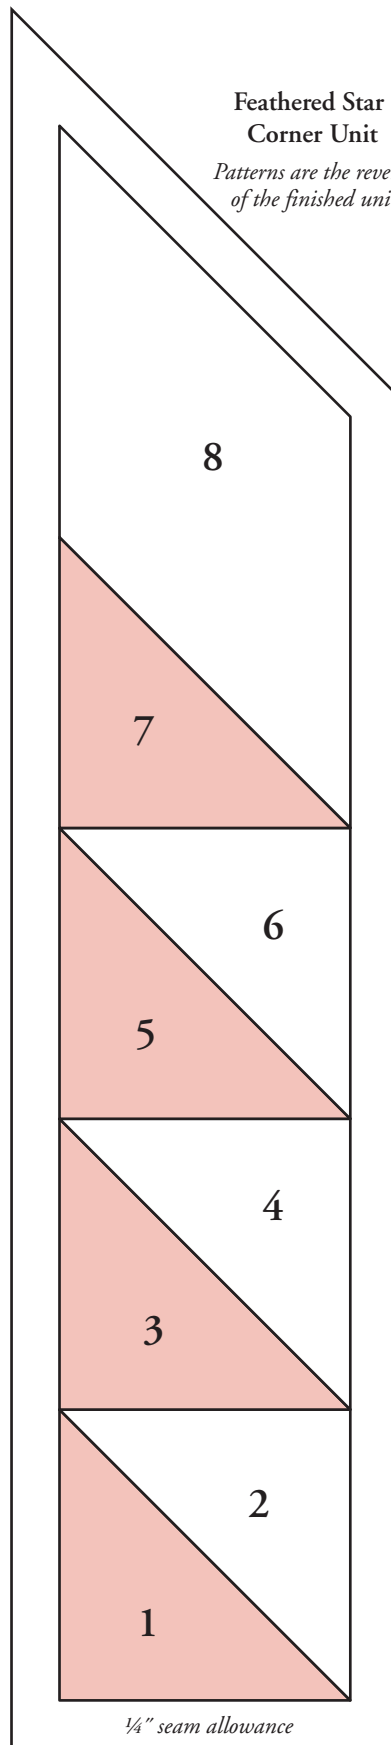

In our December 2005 issue, we presented *A Quilter's Snowflake*, designed and made by Richard Larson. This lovely quilt can be made with traditional patch piecing methods or with paper-foundation piecing. If you prefer to paper piece, foundations for the "feathers" in the Feathered Star are given here. Use these foundations in place of the A and B patches.

Make 4 copies of each corner unit foundation pattern and 4 copies each of the side unit foundations by tracing or on a photocopier. Piece each foundation in numerical order. Complete the star as described in the issue.

Please note: The outer lines of the corner unit patterns shown on this page may be slightly outside your print area. Be sure to include a 1/4-inch seam allowance on all pattern pieces.

Feathered Star Corner Unit

Patterns are the reverse of the finished unit.
